

Minimum Disclosure Document - 30 June 2025

FUND DETAILS

The Taquanta Stable Income FR Fund aims to generate higher levels of interest income than a Money Market portfolio, with little capital volatility over the short term. The portfolio is able to invest in a select combination of securities including assets in liquid form and securities, such as money market instruments and other interest-bearing securities.

FUND OBJECTIVE

The Taquanta Stable Income FR Fund is an Interest Bearing - Short Term portfolio. The objective of the portfolio is to generate higher levels of interest income than a money market portfolio, with little capital volatility over the short term. Notwithstanding anything to the contrary in this investment policy, the investments of the portfolio will be subject to the manner in which the limits and conditions subject to which securities or classes of securities may be included in a portfolio of a collective investment scheme in securities determined in legislation as amended from time to time.

INVESTMENT STRATEGY

The portfolio will actively buy and sell securities to achieve the best possible return from short maturity assets, with as little capital volatility as possible. The portfolio will adhere to the exposure limits of the Interest Bearing - Short Term category and will be managed in such a manner as to comply with prudential requirements as per regulations to the Pension Funds Acts, 24 (Act 24 of 1956).

FEES

Service Fee (incl. VAT p.a.): 0.86%
Cost Ratios (incl. VAT):
* Total Expense Ratio (TER%)²: 0.87%
* Transactions Costs Ratio (TC%)¹: 0.00%
* Total Investment Charges (TIC%)¹: 0.87%
* Performance Fee (PF) Included in TER: 0.00%

¹ Total Investment Charges (TIC%) = TER (%) + TC (%). ² The Total Expense Ratio (TER%) of a portfolio, expressed as a percentage of the daily average value of the portfolio, is calculated over a period of usually a financial year and represents a measure of the portfolio's assets that were relinquished to meet portfolio operating costs, including charges, levies and fees. Typical expenses which are deducted from a portfolio include service charges, taxes, trustee fees and audit fees. ³ Unit prices are published daily on the Manager's website. Investor instructions received after 14:00pm shall be processed the following business day.

MARKET COMMENTARY

South Africa remains susceptible to external shocks stemming from global trade tensions and geopolitical conflicts, given its limited capacity to cushion against such disruptions. According to the South African Reserve Bank (SARB), escalating geopolitical instability and heightened global policy uncertainty continue to pose significant risks to the country's financial sector.

Despite this challenging backdrop, the South African Rand showed resilience. On June 30, 2025, the USD/ZAR exchange rate closed at 17.7874. Over the past month, the rand has appreciated by 1% and gained 2.4% year-on-year against the USD. The SARB's biannual Financial Stability Review, released on June 19, emphasized the risks posed by global uncertainties. Nevertheless, Governor Lesetja Kganyago affirmed that South Africa's financial system has thus far demonstrated considerable resilience in navigating global shocks.

Headline inflation remained anchored at 2.8% year-on-year in May, unchanged from April and marking the lowest level in five years. Price increases in food and non-alcoholic beverages, housing and utilities, and clothing and footwear were offset by softer inflation in categories such as alcohol and tobacco, accommodation, and personal care. Core inflation held steady at 3.0%.

Governor Kganyago reiterated the case for lowering the country's inflation target, arguing that the current 3-6% range weakens the rand and enables persistently high prices. The SARB continues to advocate for anchoring inflation expectations around a revised midpoint of 3%, a move currently under policy review.

In the United States, inflation pressures showed a mild uptick. The Personal Consumption Expenditures (PCE) index indicated a 2.3% annual rise in May, up from 2.2% in April. Core PCE inflation, excluding food and energy, rose by 2.7%, compared to 2.6% the previous month. While U.S. inflation edged higher, the broader impact of recently imposed tariffs by the Trump administration has yet to materialize fully in consumer prices. However, Fed Chair Powell warned that inflation could intensify in the months ahead as import costs begin filtering through to retail prices. Notably, U.S. consumer spending contracted by 0.1% in May-the first decline since January-while personal income also fell, reflecting a cautious shift in household behaviour.

On the corporate front, Moody's has placed Transnet's credit ratings under review for a possible downgrade, pending government action. The South African government is in the process of allocating additional guarantees to support the state-owned freight and logistics entity. The Minister of Transport, in agreement with the Minister of Finance, has approved a R51 billion guarantee facility to cover Transnet's debt redemptions and capital expenditure requirements over the next five years.

In the month of June, the 3-month JIBAR rate was 0.033% lower versus the previous month to 7.292% while the 12-month JIBAR rates decreased by 0.033% versus the previous month to 7.667% in South Africa.

Please Note: The above commentary is based on reasonable assumptions and is not guaranteed to occur.

GLOSSARY

Net Asset Value (NAV): Means net asset value, which is the total market value of all assets in a portfolio including any income accruals and less and deductible expenses such as audit fees, brokerage and service fees.

Annualised Return: Is the weighted average compound growth rate over the performance period measured.

Highest & Lowest Return: The highest and lowest rolling twelve-month performance of the portfolio since inception.

Total Expense Ratio (TER): Reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's.

Transaction Costs (TC): Is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns.

Total Investment Charge (TIC): Should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager.

Total Investment Charges (TIC%): = TER (%) + TC (%): The Total Investment Charges (TIC), the TER + the TC, is the percentage of the net asset value of the class of the Financial Product incurred as costs relating to the investment of the Financial Product. It should be noted that a TIC is the sum of two calculated ratios (TER+TC).

FUND RISK

Interest Rate Risk: The values of bonds and other debt securities are inversely proportional to the change in interest rates. Interest rate risk is generally greater for investments with longer maturities as well as when the market does not expect a change in the interest rates

Credit Default Risk: The risk that the government entity or company that issued the bond will run into financial difficulties and won't be able to pay the interest or repay the principal at maturity. Credit risk applies to debt investments such as bonds. The higher credit rating the less likely the possibility of the issuing company defaulting.

MANDATORY DISCLOSURE:

Collective Investment Schemes are generally medium to long-term investments. The value of participatory interests (units) may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investments are traded at ruling prices and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges, minimum fees, and maximum commissions, as well as detailed description of how performance fees are calculated and applied, is available on request from FundRock Management Company (RF) (Pty) Ltd ("the Manager"). The Manager does not provide any guarantee in respect to the capital or the return of the portfolio. Excessive withdrawals from the portfolio may place the portfolio under liquidity pressure and in such circumstances, a process of ring-fencing of withdrawal instructions and managed pay-outs over time may be followed. Commissions and incentives may be paid, and if so, are included in the overall costs. The Manager may close the portfolio to new investors in order to manage it efficiently according to its mandate. Prices are published daily on the Manager's website. Additional information, including Key Investor Information Document ("KIID"), Minimum Disclosure Document ("MDD"), as well as other information relating to the basis on which the Manager undertakes to repurchase participatory interests offered to it, and the basis on which selling and repurchase prices will be calculated, is available, free of charge, on request from the Manager. The value of an investment is dependent on numerous factors which may include, but not limited to, share price fluctuations, interest and exchange rates and other economic factors. The Manager ensures fair treatment of investors by not offering preferential fee or liquidity terms to any investor within the same strategy. The Manager is registered and approved by the Financial Sector Conduct Authority ("the Authority") under the Collective Investment Schemes Control Act No. 45 of 2002 ("CISCA"). The Manager retains full legal responsibility for the portfolio.

The Financial Services Provider ("FSP"), Taquanta Asset Managers (Pty) Ltd, FSP No. 618, is authorised under the Financial Advisory and Intermediary Services Act 37 of 2002 to render investment management services. The annualized total return is the average return earned by an investment each year over a given time period, since the launch date of the portfolio. Actual annual figures are available from the Manager on request. The highest and lowest one (1) year returns represent the highest and lowest actual returns achieved during a 12-month rolling period year since the first launch date of the portfolio. The performance figures are the yields on a Net Asset Value ("NAV") basis. The yield figure is not a forecast. Performance is not guaranteed, and investors should not accept it as representing expected future performance. Individual investor performance may differ as a result of initial fees, time of entry/actual investment date, date of reinvestment, and dividends withholding tax. Performance is calculated for a lump sum investment on a NAV. The performance figures are reported net of fees with income reinvested. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction Costs are a necessary cost in administering the financial product and impacts financial product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees.
